

New Curricula and Credential Update for Avaya Session Border Controller

Overview

Avaya Learning is pleased to inform about updated and new training as well as credential offerings associated to Avaya Session Border Controller.

- Refreshed Curricula and Exams for Avaya Aura® Communication Application Credentials (ACIS - 7130 and ACSS - 7230)
- New Credential Releases
 - Avaya Session Border Controller for Enterprise Platform Independent (ASPS - 5107)
 - Avaya Session Border Controller for Midmarket Solutions (ASPS - 5004)

Avaya Session Border Controller for Enterprise and for Midmarket Solutions

Greater Security for Your Unified Communications Solutions

The Avaya Session Border Controller is a flexible, fit for purpose solution for Enterprises - that includes a set of standard security features. The Avaya Session Border Controller for Enterprise provides all the functionality required for an enterprise to terminate SIP trunks without the complexity and higher price associated with typical SBCs and scales up to 2,000 simultaneous sessions per server.

The Mid-market offers based around the Avaya IP Office platforms leverage the same Avaya SBCE software load as in the Enterprise offer. While the software load is the same, key differences in the offers are driven by applicability of features to the Mid-market

Refreshed Curricula and Exams for Avaya Aura® Communication Application Credentials (ACIS - 7130 and ACSS - 7230)

Avaya is pleased to announce the refreshed curricula and exams for Avaya Aura® Communication Applications credentials. Courseware and exams have been quality reviewed and updated to be aligned with the latest Avaya Session Border Controller offering. The Credential Requirements to earn the Avaya Aura® Communication Application Credentials (ACIS - 7130 and ACSS - 7230) remain the same and as posted on the associated learning maps hosted on the Avaya Learning Center.
